SUSTAINABILITY PLAN for NATURE LOVING KIDS PROJECT-NLK

Participation in this KA229 Erasmus+ project titled Nature Loving Kids has provided several long-term benefits to the partners:

(Project Management)

Each partner has improved their capacity to: conduct accurate financial reporting, cope with strategic planning, monitoring, and evaluation, cooperate and work collaboratively in transnational partnerships, organize national and international events, build problem-solving, creative, critical thinking, digital, and interpersonal skills, improve research methods, strengthen collaboration with local and national stakeholders/authorities, and develop dissemination strategies, become more skilled at drafting reports, accomplishing tasks, taking on additional responsibilities for green, nature-friendly practices, prioritizing the inclusion of all members of societies, and so on.

(Nature Education)

Each partner has gained a thorough understanding of Nature Education, its current state in partner countries, the motivating factors for its importance in society's sustainable development, the most appropriate approaches and methods for incorporating Nature Education at kindergartens, the needs of teachers and students for it, and ways to raise awareness for Nature Education in school communities, among other things. Without a doubt, partners will continue to work on this issue, perhaps with different focus, such as STEM activities in Nature, etc.

Erasmus+ Programme
of the European Union

The continuation of cooperation between the partners after the project has ended is a requirement for the SUSTAINABILITY of the project results. Taking this into consideration, during the last LTT in Latvia, partners discussed the sustainability plan to guide themselves in increasing the project's long-term impact.

-The project's web page and social media accounts will be kept active after the project has ended, and any interested partner will consider maintaining any social media account after the project finishes.

-Results will be shared on the Erasmus+ Project Results Platform

-Project Outputs: NLK Activity Pack, International Recipe Pack, Flora & Fauna Picture Dictionary will be prepared in an online environment with downloadable free access pdf materials on the European level. They will be accountable for the project website's subdomain.

-Partners will ensure that the project outputs are promoted on the website of their local authorities.
